

Achieving Compliance with MiCAR

Do you want to be a part of the digital assets world?

Regulation (EU) 2023/1114 on Markets in Crypto-Assets (MiCAR) came into force on March 28, 2024, and requires companies that issue or trade crypto-assets to comply with a wide range of regulations relating to licensing, transparency and investor protection.

Herausforderungen

Regulation of Crypto Assets

MiCAR defines and categorises different types of crypto-assets. Specific requirements are defined for each category in order to structure the market and make it more secure.

Licensing

Providers of services related to crypto-assets must obtain a license from the relevant national authorities.

Transparency and Disclosure

Issuers of crypto-assets are obliged to disclose comprehensive information in a public document, a so-called whitepaper, including details about the project, the technology, risks, investors' rights and ESG data.

Business Organisation

Providers of crypto services must ensure proper business organisation, including internal control systems, risk management and clear governance.

Why LPA?

DLT-Experience

Our consultants have extensive DLT project experience, from supporting initial business analyses and strategy development to the subsequent regulatory and technical steps.

Regulatory Expertise

Our team has extensive regulatory expertise to conduct an assessment of the current environment and define necessary next steps to establish compliance with MiCAR.

Your Perfect Partner

Our combination of compliance expertise, paired with deep knowledge of banking processes, makes LPA the optimal partner to ensure compliance with MiCAR and optimize your business processes.
